

Project Demo Planning

Date	05 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Project Demo Planning:

This document outlines the demonstration plan for the **Personalized Networking Assistant**, covering the project workflow, AI models, system architecture, user interface, networking recommendation process, and application features in a clear and organized manner.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objectives, and the challenges faced during professional networking.	2	Ratna Amulya Karri
2	Solution Overview	Explain the system architecture, AI models (DistilBERT & GPT-2), FastAPI backend, Streamlit frontend, and overall workflow.	3	Anjali Yanamadala
3	Live Feature Demonstration	Demonstrate user registration, profile creation, event theme analysis, AI-generated conversation starters, fact verification, and networking recommendations.	5	Mahidhar Doddipatla
4	AI Model Performance	Present the AI models used, recommendation process, event theme analysis, and response accuracy.	2	Nandini Diyyana
5	Future Scope	Explain cloud deployment, LinkedIn integration, real-time event synchronization, and future AI enhancements.	2	Siva Rama Krishna Veepu
6	Conclusion & Q&A	Summarize the project, highlight key achievements, and answer questions from the evaluation panel.	3	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an AI-powered networking assistant and how it helps professionals, students, and conference participants build meaningful connections.
2	Solution Overview	Present the project architecture, Streamlit interface, FastAPI backend, DistilBERT, GPT-2, Wikipedia API integration, and database workflow.
3	Live Feature Demonstration	Demonstrate user login, profile setup, event theme analysis, AI-generated conversation starters, networking recommendations, and fact verification through the application.
4	Q&A Session	Answer questions from evaluators, explain project implementation, and discuss future enhancements such as IBM Cloud deployment, LinkedIn integration, and advanced AI recommendations.
