

Demonstration of Proposed Features

Date	05 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document summarizes the implemented features of the Personalized Networking Assistant and their completion status. It serves as evidence that the proposed AI-powered networking functionalities were successfully developed and demonstrated.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Registration & Login	Developed a secure user authentication system for registration and login.	Implemented	Yes	Successfully completed
2	User Profile Management	Collects user profile details such as profession, interests, skills, and career goals.	Implemented	Yes	User profiles stored successfully
3	Event Theme Analysis	Uses DistilBERT to analyze event topics and identify relevant discussion themes.	Implemented	Yes	Accurate event analysis achieved
4	AI Conversation Generator	Uses GPT-2 to generate personalized conversation starters for networking events.	Implemented	Yes	Relevant conversation suggestions generated
5	Fact Verification	Integrates the Wikipedia API to verify information related to networking topics.	Implemented	Yes	Verified information displayed successfully
6	Prediction Result Display	Displays AI-generated networking recommendations, conversation history, and personalized suggestions through the Streamlit interface.	Implemented	Yes	User-friendly dashboard demonstrated

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100 %
