

Team Involvement in Demonstration

Date	05 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document describes the demonstration activities for the **Personalized Networking Assistant**, including the project workflow, AI models, networking recommendation process, system architecture, and live application demonstration, ensuring a structured and effective presentation.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	Ratna Amulya Karri (Team Lead)	Project Introduction	Introduction & Problem Statement	Presented the collection of historical rainfall and weather datasets used for training the flood prediction model.	Active
2	Anjali Yanamadala	Solution Architecture	System Architecture & Workflow	Demonstrated data cleaning, preprocessing, handling missing values, and preparing the dataset for model training.	Active
3	Mahidhar Doddipatla	AI Model Demonstration	Event Theme Analysis & Conversation Generation	Explained feature selection and the importance of rainfall, cloud visibility, and seasonal rainfall in prediction.	Active
4	Nandini Devika Diyyana	Live Feature Demonstration	Fact Verification & Networking Recommendations	Demonstrated the training and evaluation of the Decision Tree, Random Forest, and K-Nearest Neighbors models.	Active
5	Siva Rama Krishna Veepu	Future Scope	Future Enhancements & Deployment	Demonstrated the prediction module by entering weather inputs and displaying flood risk prediction results.	Active
6	All Team Members	Q&A Support	Discussion Session	Answered evaluator questions and explained project implementation	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	Ratna Amulya Karri
Over all Team Coordination Rating (1-5)	5/5
Any issues during demo	Minor synchronization issues occurred during the initial project rehearsal while integrating the Streamlit frontend with the FastAPI backend.
How issues were resolved	Conducted multiple rehearsal sessions,assigned clear presentation responsibilities to each team member,verified AI model integration,and finalized the demonstration flow before the final presentation.
