

Project Executable Files

Date	05 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	3 Marks

Project Executable Files

This section includes all executable and supporting files required for the Personalized Networking Assistant application. The project contains AI-powered networking features such as conversation starter generation, event theme extraction, fact checking, feedback logs, and session history.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

The following section presents the file and folder structure of the **Personalized Networking Assistant**, highlighting the organization of the source code, API routes, services, frontend interface, testing modules, configuration files, and supporting project files.

Personalized-Networking-Assistant/

```
— .gitignore
— README.md
— requirements.txt
— .env
— .env.example
— feedback.json
— history.json

— app/
  — __init__.py
  — config.py
  — main.py
  — schemas.py

  — routers/
    — conversation.py
    — factchecker.py
    — history.py
    — feedback.py

  — services/
    — generator.py
    — fact_checker.py
    — session_manager.py
    — theme_extractor.py

— frontend/
  — streamlit_app.py

— tests/
  — conftest.py
  — test_event.py
  — test_factchecker.py
  — test_generator.py
  — test_routes.py

— .pytest_cache/
```

Personalized Networking Assistant/

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://personalized-networking-assistant-1lwu.onrender.com https://energetic-gentleness-production-0dc1.up.railway.app/ https://personalized-networking-assistant-production-4725.up.railway.app/
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Render , Railway
Repository Link	https://github.com/RatnaAmulya/Personalized-Networking-Assistant
Demo Video Link	https://drive.google.com/file/d/1zqNN-dlwLh4-GyuIcwdVplR7O3W3eTo2/view?usp=drive_link

Step 4: Run Instructions

The following instructions explain how to run the Personalized Networking Assistant locally and generate AI-powered networking conversation starters, verify networking topics, and manage session history using the FastAPI backend and Streamlit web application.

Pre-requisites

- Python 3.10+
- pip
- Internet Browser

Steps

1. Clone/download the **Personalized Networking Assistant** project.
2. Open the project folder.
3. Install dependencies: **pip install -r requirements.txt**
4. Configure the .env file.
5. Run the application.
6. Open the local URL in your browser and use the Personalized Networking Assistant.

Step 4: Run Instructions

The following instructions explain how to run the Personalized Networking Assistant locally and generate AI-powered conversation starters, verify networking topics, and manage session history using the FastAPI backend and Streamlit web application.

Pre-requisites:

- Python 3.10+
- pip
- Internet Browser

Steps:

Step 1: Clone/download the Personalized Networking Assistant project.

```
git clone < GitHub Repository Link >
```

Step 2: Open the project folder.

Step 3: Install dependencies:

```
pip install -r requirements.txt
```

Step 4: Run the FastAPI backend:

```
python app/main.py
```

Step 5: Run the Streamlit frontend:

```
streamlit run frontend/streamlit_app.py
```

Step 6: Open the browser at: <http://localhost:8501> and enter your networking goals, event details, and preferences to generate personalized conversation starters, verify networking topics, and manage session history.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI responses may occasionally be generic.	Improve prompts and model tuning.
2	Fact checking requires internet access.	Use cached/offline knowledge where possible.
3	Limited personalization without user history.	Future integration with user profiles and cloud data.
